Synoptic Operative Report

Report Origin: CDHA (Q)

Patient: WEBSMR, PATIENT
Birth Date: 1965-Jun-06
MSI #: 0035007777
CDHA #: 0002330185
Encounter#: 40800310

Surgeon: PORTER, Geoffrey Allan
(12526)
Surgery Date: 2010-Jun-18
Submitted: 2010-Jun-21 (12:03 PM)

RECTAL CANCER TEMPLATE

PRE/POST OPERATIVE DIAGNOSIS

Date of Surgery: 2010-06-21

Do you know patient's No
height & weight?:

Was surgery delayed for No delay (<30 days)
any reason?:

Were any of your elective patients Yes
rescheduled due to this procedure?:

BMI Status: Normal (18.5 -24.9)

ECOG Status: 0-Fully Active, able to carry on all pre-disease performance without
restriction

ASA Scale: I - healthy patient

Tumour: Cancer

Preop Diagnosis: Rectal Cancer

Associated conditions: None

Operative Diagnosis same as Yes
Preoperative Diagnosis:

Operative Diagnosis:: Rectal Cancer

ANORECTAL FUNCTION

Anorectal Function: Continent

SEXUAL FUNCTION

Sexual Function: Normal

CLINICAL EVALUATION

Palpable on digital exam: Yes

Position: anterior

Preop Biopsy: adenocarcinoma

Contrast Enema: Not Done

Endorectal Ultrasound: Not done

MRI: Not Done

CLINICAL EVALUATION CONT'D

Colonoscopy: Complete

Polyps: No

Synchronous Cancers None
Sites:

TESTS AND PROCEDURES

Tests and Procedures CXR, CT
Done: Abdomen/Pelvis

DETAILS OF TESTS

Details of Liver Mets: None

Male Local Invasion: None

Female Local Invasion: None

ANESTHESIA

Pre-op Chemotherapy: Yes

Pre-op Radiotherapy: Long-course radiation

Clinical Response: Partial

Surgical Safety Checklist: Done

Timeout safety check: Done

Anesthesia: Combined General & Epidural

Surgical Indications:: Elective

SURGICAL INDICATIONS

Elective procedure: Primary

Elective procedure care: Curative

Previous diversion None
procedure done::

TUMOUR BANKING

Is this patient a candidate for tumour No
banking?:

PROCEDURE PERFORMED

Procedure Performed: Low Anterior Resection

LOW ANTERIOR RESECTION

LAR position:: Lithotomy

Adhesions on Laparotomy: None/minimal

Rectal Cancer Evaluation: below peritoneal reflection

Mets on Laparotomy: None

Female Local Invasion: None

Left ureter:: Identified/preserved

Right ureter:: Identified/preserved

Left hypogastric nerve:: Identified/preserved

Right hypogastric Identified/preserved
nerve::

Structures resected with No
rectum?:

TME procedure done:: Total (to levators)

Mesorectal envelope surgically Yes
penetrated?:

Mobilization: cautery

Clinical Margins (in vivo)-distal (cm): 2

Complications: None

Any other complications?: No

Rectal Stump wash out: No

Reservoir: none

Anastomosis: stapled

Transverse Stapler Size: 30

Donuts intact: Yes

Circular Stapler Size: 29

Level of anastomosis above anal verge 4
(cm)::

Sigmoidoscopy: Intact Anastomosis

LAR Stoma type: Loop ileostomy

LAR Stoma Site: Right lower quadrant (RLQ)

COLON

Was colon surgery required during this No
rectal procedure?:

GENERAL CLOSURE

Sponge and instrument count completed and correct: Yes

Drains: Yes

Abdominal wall suture technique: Running

Abdominal wall suture type: PDS

Abdominal wall suture size: 1

Drain type: Jackson Pratt

Drain location: Left lower quadrant (LLQ)

Skin Closure: staples

Estimated blood loss (cc): 200

Blood replaced: No

Status of patient: Stable

Operative time (minutes skin to skin): 151-180 mins

Unit transferred to:: Recovery room

FOLLOW UP

Planned long term care follow-up: Yes

Ammendments:

No ammendments have been created for this response.
