

VG Parking Challenges

As many of you know parking at the VG site is very difficult. Often patients are from out of HRM, have mobility challenges and are not well and must use their vehicle to come to this site.

To that end, we are trying the best we can to ensure our limited parking spaces are available for patients. We are now asking that where possible management do not hold meetings at the VG/Rehab site to minimize staff from using patient parking spaces. There are a number of off site locations that have meeting/education rooms both large and small and best of all "free parking".

Here is a list of locations and contact for room bookings:

Location	Room	Capacity	Available Equipment	Network Jack	Contact
Addiction Prevention and Treatment Services
