Radiation Safety for Security Services

Quiz #2 - Refresher

Employee Name (PRINT) _____ Department _____

Answer the questions and have your manager forward the quiz to the Radiation Safety Office

Match the five statements below to the room access colour.

- _____ Some of these rooms may be locked at night but they do not need to be locked for radiation safety purposes.
- _____ This room must be locked at all times unless a person is physically present inside the room.
- _____ This room may be unlocked when the department is opened but must be locked when the department is closed.
- _____ During normal working hours, when the department is opened, if this room is opened and no one is present, an incident report must be filled out and the Radiation Safety Officer must be called.
- _____ The checking of this room is the highest priority for security.

Circle only one choice for each question.

- Security radiation exposures are kept to the same limit as what group?
general public **radiation workers** **nuclear energy workers**
- What are considered the radiation protection concepts?
(training, gowning, security) **(dose, cleaning, reporting)** **(time, distance, shielding)**

TRUE OR FALSE: Select whether the statement is True or False and circle the choice.

8. T F If the warning light is flashing outside an x-ray room, you should wait before entering.
9. T F The hospital emergency number for radiation accidents is 3333.
10. T F Security radiation exposure is more than ten times the general public limit.
11. T F All radioactive packages, received after hours, must only be delivered to the designated room
12. T F Security personnel have to wear lead aprons when receiving packages after hours.
13. T F Security services forms part of the emergency department radiation response plan.
14. List three areas (Building and Floor) where radioactive material or devices are used in Capital Health.

15. The four basic responses to any radiation emergency are:
Don't touch, Secure the Area, _____ and _____

Acknowledgement of Refresher Training

I understand the radiation safety concepts that relate to my job.
