

Using the Nutrition Facts Table: % Daily Value

How to CHOOSE

The Nutrition Facts table gives you information on calories and 13 core nutrients. Use the amount of food and the % Daily Value (% DV) to choose healthier food products.

Follow these three steps:

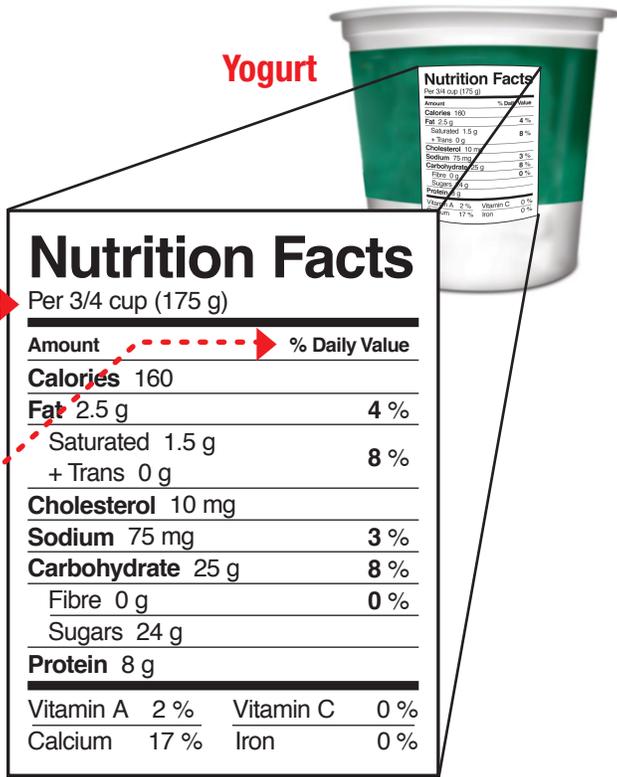

1 LOOK at the amount of food
Nutrition Facts are based on a specific amount of food. Compare this to the amount you actually eat.

2 READ the % DV
The % DV helps you see if a specific amount of food has a little or a lot of a nutrient.

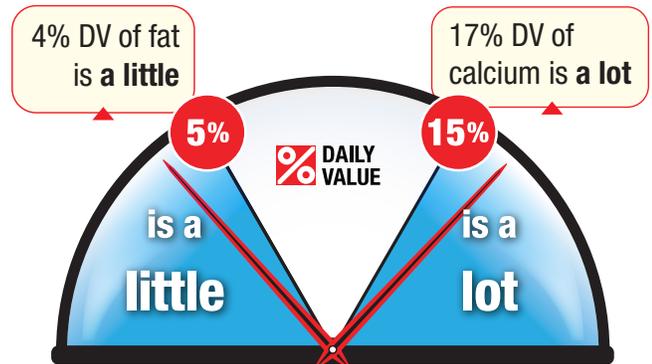

5% DV or less is a **LITTLE**
15% DV or more is a **LOT** } This applies to all nutrients.

3 CHOOSE
Make a better choice for you. Here are some nutrients you may want...

- | | |
|----------------------------|----------------|
| less of | more of |
| • Fat | • Fibre |
| • Saturated and trans fats | • Vitamin A |
| • Sodium | • Calcium |
| | • Iron |

Here is an example of how to choose:
You are at the grocery store looking at yogurt. The small container (175 g) of yogurt you pick has **a little** fat (4% DV) and **a lot** of calcium (17% DV) – this is a better choice if you are trying to eat less fat and more calcium as part of a healthy lifestyle!

How to COMPARE

Use the amount of food and the % Daily Value (% DV) to compare and choose healthier food products.

Follow these three steps:

1 LOOK at the amounts of food

Compare the amounts of food in the Nutrition Facts tables.

Cracker A has 9 crackers and weighs 23 grams. **Cracker B** has 4 crackers and weighs 20 grams.

Because the weights are similar, you can compare these Nutrition Facts tables.

2 READ the % DVs

Since you are comparing crackers, you may want to look at the % DVs for saturated and trans fats, sodium and fibre.

Cracker A has 13% DV for saturated and trans fats, 12% DV for sodium and 4% DV for fibre.

Cracker B has 2% DV for saturated and trans fats, 4% DV for sodium and 12% DV for fibre.

Remember: 5% DV or less is a little and 15% DV or more is a lot. This applies to all nutrients.

3 CHOOSE

In this case, **Cracker B** would be a better choice if you are trying to eat less saturated and trans fats, less sodium and more fibre as part of a healthy lifestyle.

Use the Nutrition Facts table and *Eating Well with Canada's Food Guide* to make healthier food choices.

Did you know?

You may be able to compare products that don't have similar amounts of food.

For example, you could compare the % DVs of a bagel (90 g) to the % DVs of 2 slices of bread (70 g) because you would most likely eat either amount of food at one meal.
