Finding Capital Health patient education pamphlets at home

March 2014
1. Visit Capital Health’s home page:
2. Click on Library on green banner:
3. On the Health Sciences Library home page, look on the menu on the left for “Patient Pamphlets”. This will take you to the home search page for patient pamphlets.
4. Pamphlet search page:
http://library.cdha.nshealth.ca/chlibrary/Pamphlets/

From here you can search using:

• A **keyword** in the “any word or phrase” search box, or
• A **word** you know is in the **title** of the pamphlet you are trying to find, or
• **The 4 digit pamphlet code**, found on the back cover of every official pamphlet, at the bottom left before the date of the pamphlet. (There are usually 2 letters, followed by 85, followed by a 4 digit number.)

The quickest way to any pamphlet you want to find is to put that 4 digit number into the “Pamphlet number” search box.

**Simple is better!** Try using one keyword if you don’t have the 4 digit code, rather than the whole title.

Please contact pamphlets@cdha.nshealth.ca if you have any trouble locating a pamphlet, or call 464-3144.
5. Example: Search for “liver”
There are 2 links under each search result. The first links directly to the PDF and downloads it when this link is clicked. You can email this link or share it as needed. The Permanent Link is also sharable, and links to the full library record for this item.
