Objectives

- Identify three areas of medico-legal risk for pathologists
- Incorporate two strategies to reduce risk in your lab/practice

© The Canadian Medical Protective Association cmpa-acpm.ca

 3 Ds that will affect your defensibility

- Delay in diagnosis
- Documentation
- Diligence with protocols

What Are the Top 3 Conditions to be Misdiagnosed?

1. Neoplasms / diseases of the breast
2. Neoplasms / diseases of the digestive tract
3. Neoplasms / diseases of the skin

© The Canadian Medical Protective Association cnpa-acpm.ca

63% of cases involved cancer delay in diagnosis/treatment

Medicolegal Aspects of Error in Pathology

David B. Tronel, MD

Objective.—To discuss the various ways error is defined in surgical pathology. To identify errors in pathology practice identified by an analysis of pathology malpractice claims.

Design.—Three hundred seventy-eight pathology malpractice claims were reviewed. Nuisance claims and autopsy claims were excluded; 115 pathology claims remained and were analyzed to identify repetitive patterns of specimen type and diagnostic category.

Setting.—All pathology malpractice claims reported to The Doctors Company of Napo, Calif, between 1998 and 2003.

Results.—Fifty-seven percent of malpractice claims involved just 5 categories of specimen type and/or diagnostic error, namely, breast specimens, melanoma, cervical Papanicolaou tests, gynecologic specimens, and system (operational) errors. Sixty-three percent of claims involved failure to diagnose cancer, resulting in delay in diagnosis or inappropriate treatment.

Conclusion.—A false-negative diagnosis of melanoma was the single most common reason for filing a malpractice claim against a pathologist. Nearly one third involved melanoma misdiagnosed as Spitz nevus, "dysplastic" nevus, spindle cell squamous carcinoma, atypical fibroxanthoma, and dermatofibroma. While breast biopsy claims were a close second to melanoma, when combined with breast fine-needle aspiration and breast frozen section claims, breast specimens were the most common cause of pathology malpractice claims. Cervical Papanicolaou test claims were third in frequency behind melanoma and breast; 98% involved false-negative Papanicolaou tests. Forty-two percent of gynecologic surgical pathology claims involved misdiagnosed ovarian tumors, and 85% of these were false-negative diagnoses of malignancy. The most common cause of system errors was specimen "mix-ups" involving breast or prostate needle biopsies. (*Arch Pathol Lab Med.* 2006;130:617-619).

From CMPA cases

- Missed diagnosis
 - abnormality seen but not reported
 - abnormality present but not seen
 - missed on exam
 - missed on section / staining
 - technical error
 - sampling error

© The Canadian Medical Protective Association cempa-acpm.ca

From CMPA cases

- Incorrect diagnosis
 - over-interpretation of findings
 - failure to consider alternative diagnosis
 - seeing what is expected, rather than what is there

© The Canadian Medical Protective Association cmpa-acpm.ca

15 % of cases involved a mix-up of specimens/slides

- Mix-up of slides
- Mislabelling of specimens
- Lack of quality control measures
- Failure to comply with existing laboratory processes

© The Canadian Medical Protective Association cmpa-acpm.ca

Let's Look at Some Cases

Case #1

Negligence: the Legal Concept

© The Canadian Medical Protective Association cmppa-acpm.ca

Negligence: the Legal Concept

Duty
of Care

Breach
of duty

DUTY OF CARE

1. The courts say a duty of care arises naturally out of a doctor-patient relationship.

Causation

© The Canadian Medical Protective Association cmppa-acpm.ca

Negligence: the Legal Concept

Duty
of Care

BREACH OF DUTY

2. In determining a breach of duty of care to a patient, the courts consider the standard of care and skill that might reasonably have been applied in similar circumstances by a colleague – a normal prudent practitioner of similar training and experience. The courts do not expect perfection.

Harm or
Injury

© The Canadian Medical Protective Association cmppa-acpm.ca

Courts are generally sympathetic

“A doctor is not expected to be infallible, only to exercise reasonable care, skill and judgment in coming to a diagnosis. If this is done, the doctor will not be held liable even if the diagnosis is mistaken”

(Picard & Robertson)

© The Canadian Medical Protective Association 43000801 cmppa-acpm.ca

Crits v Sylvester, 1956

"Every medical practitioner must bring to his task a reasonable degree of skill and knowledge and must exercise a reasonable degree of care. He is bound to exercise that degree of care and skill which could reasonably be expected of a normal, prudent practitioner of the same experience and standing, and if he holds himself out as a specialist, a higher degree of skill is required of him than one who does not profess to be so qualified by special training and ability."

© The Canadian Medical Protective Association cmppa-acpm.ca

Negligence: the Legal Concept

HARM OR INJURY

3. To establish negligence it is not enough for the patient to demonstrate that the physician has breached duty of care. The patient must have suffered harm or injury because of the breach

Get a grip. Get advice. Take the advice.

© The Canadian Medical Protective Association cmppa-acpm.ca

 **Anatomy of a Lawsuit**

© The Canadian Medical Protective Association cmppa-acpm.ca

Doctors' involvement in lawsuits

- As defendants
- As medical experts
- As witnesses of fact

© The Canadian Medical Protective Association cmppa-acpm.ca

Testimony – **Fact Witness**

- Usually in the role of treating physician
- Ensure that a consent is signed
 - Even if your patient's lawyer calls
- A court summons to witness
 - Mandates release of the record and does not require consent for release
- Court trumps confidentiality to patient
- You are not required to give an "expert opinion"

© The Canadian Medical Protective Association cmppa-acpm.ca

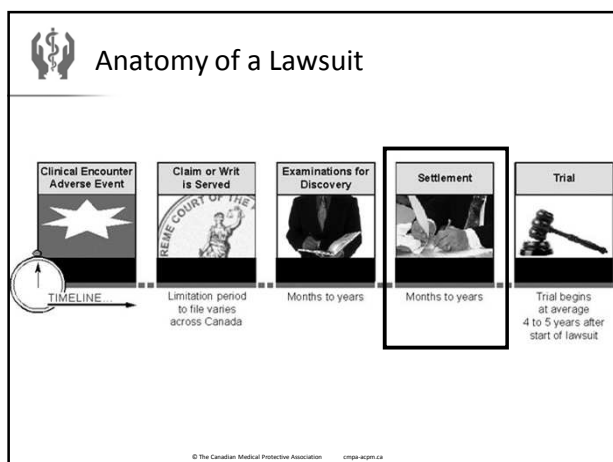

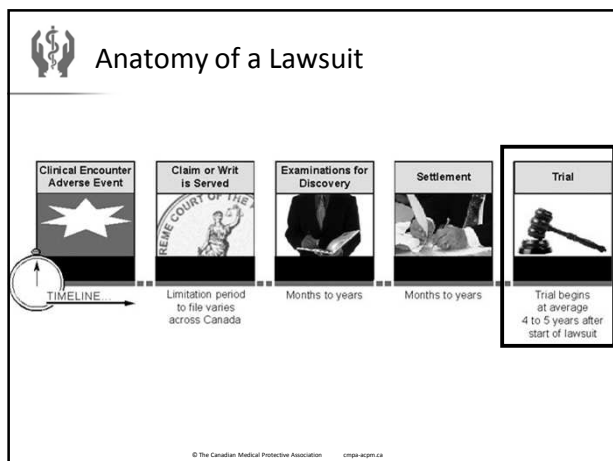

Testimony – **Expert**

- Are you really an "expert?"
- Remember the definition of "standard of care"
 - Different for generalists vs specialists
- What is your role in court?
- Duty is to the court not your "employer"

© The Canadian Medical Protective Association cmppa-acpm.ca

Testimony

- “Do I have to do it?”
- The unfortunate answer is “**MAYBE**”

© The Canadian Medical Protective Association cmppa-acpm.ca

Case #1

© The Canadian Medical Protective Association cmppa-acpm.ca

In Challenging Cases, Have You Considered?

- Further exclusionary / confirmatory investigations
- Obtaining a second opinion
- Documentation of informal 2nd opinions
- Wording of the report

© The Canadian Medical Protective Association cmppa-acpm.ca

AJCP 2000

Consensus Conference on Second Opinions in Diagnostic Anatomic Pathology

Who, What, and When *Am J Clin Pathol* 2000;114:329-326

Am J Surg Pathol 2008 May;32(5)732-7

Mandatory second opinion in surgical pathology referral material: clinical consequences of major disagreements

- Second opinion surgical pathology
- 2.3% major diagnostic disagreements

© The Canadian Medical Protective Association cmipa-acpm.ca

Consider 2nd opinion

- Do the pathology findings correspond with the referring MD's clinical impression?
- Highly significant diagnosis with irreversible surgery?
- Rare disorder
- Problematic cases

© The Canadian Medical Protective Association cmipa-acpm.ca

Be Careful What You Dictate

© The Canadian Medical Protective Association

Path Report:

- “10 lymph node fragments recovered **with none** showing metastatic deposits and the remainder showing only reactive changes”
- Should have said:
“10 lymph node fragments recovered **with one** showing metastatic deposits and the remainder showing only reactive changes”

© The Canadian Medical Protective Association cmpa-acpm.ca

Wording your reports

“Diagnostic for metastatic squamous cell carcinoma”

Experts Would Have Reported :

“ Highly atypical squamous cells
suspicious for squamous cell ca:
Recommend biopsy”

© The Canadian Medical Protective Association cmpa-acpm.ca

Am J Surg Pathol 2012 Jan;36(1):e1-5

Trends in Pathology Malpractice Claims

David B. Troxel, MD

Claims are frequently won or lost on the basis of the quality of the medical record. The pathology report should document the rationale for critical decision making. An incorrect diagnosis is easier to defend when the report reflects the thinking of a thoughtful and well-informed pathologist. In addition, claims are typically

© The Canadian Medical Protective Association cmpa-acpm.ca

Am J Surg Pathol 2012 Jan;36(1):e1-5

Postanalytic errors included a transcription error and reports or diagnoses allegedly not called to the attention of or received by the clinician. It is my impression that this allegation is increasing, and my speculation is that it may increase still more as we transition to the electronic health record. It is important to document and date all phone calls or contacts with clinicians in the pathology report, the medical record, or both.

© The Canadian Medical Protective Association cmpa-acpm.ca

Reports consider

- Define pathological terms
- Discuss DDx for challenging cases
- Document recommendations for follow-up tests or treatment
- Document verbal consultations
- Document what/ whether clinical info provided

Am J Surg Pathol 2012 Jan;36(1):e1-5

© The Canadian Medical Protective Association cmpa-acpm.ca

Reports consider

- If provisional dx until tests/ consult available
- Provide supplemental report if NB new info available after initial report
- Document interdepartmental 2nd opinions on new malignancies , diagnostic challenges, uncommon dx (bone, soft tissue tumors)

Am J Surg Pathol 2012 Jan;36(1):e1-5

© The Canadian Medical Protective Association cmppa-acpm.ca

Documentation of Discussions

- Documentation of informal 2nd opinions
- Document calls to clinicians re substantive changes
- Document telephone advice and communications with other HCP

© The Canadian Medical Protective Association cmppa-acpm.ca

Second Opinion

Could I also get your opinion on this case?
33 y.o... foot lesion

I think it's a Spitz nevus - how would you
comment on adequacy of excision ?

Thanks

As we discussed, I think that this is a nodular
melanoma.

I would be interested in knowing how long
it has been present.

© The Canadian Medical Protective Association cmppa-acpm.ca

Legal Actions Pathologists: Administrative Issues

- Non-compliance with existing fail safe system
 - Mix-up specimens/ reports/ cell contamination
- Follow-up system

© The Canadian Medical Protective Association cmpa-acpm.ca

© The Canadian Medical Protective Association cmpa-acpm.ca

Case #2

Legal Outcome

- CMPA settlement the plaintiff on behalf of Path and FP

© The Canadian Medical Protective Association cmpa-acpm.ca

Pathologist as Advocate

- Advising authorities of needs
 - New procedures in literature
 - Reported deficiencies of current procedures / policies
 - Equipment deficiencies / improvements
 - Safety issues for patients, staff

Put it in writing!

© The Canadian Medical Protective Association cmpa-acpm.ca

Risk management

- Are there clear policies and procedures: in handling, labeling, processing and reporting of tissue specimens?
- Requisition contain the pertinent clinical and specimen information as well as the correct patient identifiers?
- Do the patient identifiers on the specimen being examined match the requisition and the final pathology report?

© The Canadian Medical Protective Association cmpa-acpm.ca

What are the 3 things that can affect your defensibility as pathologist?

5 ○ \$ 1 Million

4 ○ \$500,000

3 ○ \$100,000

2 ○ \$10,000

1 ○ \$5,000

50:50

D

D

D

3 Ds that will affect your defensibility

- **D**elay in diagnosis
- **D**ocumentation
- **D**iligence with protocols

© The Canadian Medical Protective Association

cmpa-acpm.ca

Bottom Line

- Wrong diagnosis ≠ equal negligence
- Consider second opinion in challenging cases
- Consider speaking with referring MD if diagnosis unclear or clarification needed
- Follow policies to prevent mix-ups with specimens/reports
- Document your DDx, evidence for Dx, recommendations, discussions with colleagues
