

Procedures Clinics at Dalhousie Family Medicine

Dalhousie Family Medicine is excited to announce two new procedures clinics at our Mumford and Spryfield sites: a General Procedures clinic and a Women's Health Procedure clinic.

We are now accepting referrals from Family Physicians. General procedures performed include lumps and bumps removal, joint and soft tissue injections, and wedge toenail resections. In our women's health procedure clinic, we perform IUD insertions and endometrial biopsies.

General Procedures clinics are held twice monthly and Women's Health procedure clinics are held once monthly.

N.B. Your patient's procedure will be performed by a resident physician under the supervision of a Dalhousie Family Medicine staff physician.

Referral forms are attached. ***Please ensure you have read the entire form and informed the patient of important points at the end of the referral form.***

Upon receipt of the referral form our clinic will contact your patient directly to book an appointment.

Questions? Please contact Dr. Jennie Leverman, clinic co-ordinator. Phone 473-1234, Fax 473- 4353.
