

# IUD Insertion Clinic Checklist

**\*\*Must be completed by referring MD\*\***

Please note that this is an insertion clinic only and all listed requirements must be completed prior to patient's appointment. Please inform your patient that this is a teaching clinic and learners will be present for the entire appointment.

Patient information:

Name: \_\_\_\_\_

DOB: \_\_\_\_\_

G\_\_\_\_ P\_\_\_\_ A\_\_\_\_

Vaginal Delivery x \_\_\_\_\_ ; C/S x \_\_\_\_\_

- Patient has been counselled regarding insertion, safety of Mirena or Nova T, and all risks involved. Insertion procedure and management will be reviewed the day of the appointment.
- Patient has a Rx for IUD and is advised to bring with her to clinic apt. If patient has no private plan or pharmacare, please contact The Bayer Rep for information on current compassionate programs at 1-800-661-2520, ext 8329
- Chlamydia and gonorrhea swabs completed and results attached.
- Pap smear completed. Pap smears will not be performed, as results cannot be followed up in the clinic.
- If reason for IUD insertion is menorrhagia, appropriate work up is to be completed and attached (blood work, ultrasound, endometrial biopsy). Should results not be attached insertion will not occur. Work up and management post insertion is to be completed by referring physician.
- Patients who are nulliparous or have only had caesarean sections require a prescription for Misoprostol 200 mcg with instructions to insert vaginally the morning of the appointment. Patients who have had previous spontaneous vaginal deliveries do not require misoprostol.
  - Misoprostol given Yes \_\_\_\_\_ No \_\_\_\_\_
- It is **recommended** that patients have a drive home as many patients have a vasovagal response and are unable to drive safely.
